The best time to visit is April through May and September through October. During these times of the year, the weather is mild and the island is less crowded.

During these times, the temperature is typically in the mid-70s, making it a comfortable time to explore all that St. Croix has to offer. You won't have to worry about sweating through your shirt due to the heat and humidity.

Blue skies and mild temperatures make April and May perfect for spending time on the beach, going snorkeling, or playing a round of golf. You won't have to worry about a rainstorm ruining the activities you have planned for the day.

Another benefit of visiting during April or September is the scuba diving conditions. The waters tend to be much calmer during this time and there's a higher chance of good visibility.

As a result, you'll have a much better chance of spotting aquatic life. You won't have to worry about getting seasick on the boat, either. However, the best time to visit St. Croix is June and July if you're looking for a more lively and bustling island experience.

You can experience the Mango Melee, which celebrates the beginning of mango season, or the Jump Up festival. These festivals will give you a peak into authentic St. Croix culture and you won't want to miss them.

Cheapest Time to Visit Croix

If you're looking for a budget-friendly vacation to St. Croix, you should visit in November or January through March.

May through August is the most expensive time of year on the island, as the tourist season peaks and many vacationers are looking to take advantage of their summer break.

From November through March, fewer people travel to St. Croix, and flights are cheaper, making it a more budget-friendly time to visit. Additionally, you'll be able to take advantage of the best deals on hotels and airfare.

The only exception to this rule is during the holiday season in December. While there are fewer sunny days and the temperature dips into the 70s, you can still enjoy the beach.

Additionally, you'll undoubtedly appreciate being able to explore without fighting through crowds of people.

Least Busy Time to Visit Croix

If you're looking to avoid the crowds and have a relaxing vacation, visit during the off-season. The off-peak season runs from December to April when the crowds have gone and the island is quiet.

St. Croix is more similar to a small town without the bustle of crowds. You're more likely to meet locals and have an authentic experience during the off-season from December to April.

Another benefit to visiting during the off-season is that more of the islands' natural wildlife returns. The crowds in June and July scare away many of the local animals that live above and below the ocean's surface.

The downside of visiting St. Croix during this time of the year is that the weather isn't as good. You'll have to contend with rain storms, higher temperatures, and potentially hurricanes.

Additionally, since it's low season, some of the attractions will close, so you may have limited options for restaurants and accommodations.

The off-season is a great time to go as long as you're prepared to be patient with less-than-perfect weather. You can wait out the rain storms and enjoy an authentic experience visiting the St. Croix that few people get to see.

Worst Time to Visit St. Croix

The worst time to visit St. Croix is during the busy, hot summer months from June to August.

June to August is the busiest time of year in St. Croix. If you visit during this time, you'll have to contend with high temperatures, heavy rain and humidity, and crowded attractions.

Since summer is the height of tourist season here, everything from restaurants to hotels will be more expensive with longer lines and waits. The mass of tourists can ruin the otherwise wonderful aesthetic of this small island.

It can be hard to relax on the beach when hundreds of other people are there. The high season also means many of the best activities will be sold out and you'll have limited options for things to do.

However, if you're looking for a more party-like atmosphere, the best time to visit St. Croix is during this time of year when many of the best festivals are held.
