

Villa Madeleine Resort Condominium Association (“VM”) Rules & Regulations Final Revisions, February 2023

Appendix B

Cistern Water and Water Purification

Villa Madeleine Condominium villa owners are solely and exclusively responsible for the testing, purifying and maintaining the quality of water used in their individual villas. The process is technical and requires a certain level of knowledge, skill and attention which Villa Madeleine is not equipped to oversee.

Villa Madeleine is not in a position to make specific recommendations as to purification practices. There are companies on St. Croix which offer water purification, filtration equipment systems and services.
